JOB OFFER

Institut Carnot Pasteur Microbes & Health (Pasteur Microbes & Santé, Pasteur MS) is seeking for a Research Funding Manager

The Pasteur Institute (Paris) proposes a Research Funding Manager position in the context of the Institut Carnot, Pasteur Microbes and Health (Pasteur MS).

Carnot label is granted to public research structures, with proven, high level R&I competencies dedicated to fostering innovation with industrial partners. The Carnot Institutes (IC) are funded to conduct upstream research capable of renewing their scientific and technological skills, and an ambitious partnership research policy to the benefit of the socio-economic world. Through an interdisciplinary research and integrative approach, Pasteur MS aims to provide a better understanding of the fundamental mechanisms of host/pathogen interactions and microbes' impacts on human health.

Research Funding Manager position

For successful application, the candidate must be

- capable of an integrative view
- organized
- team player minded
- "getting things done" motivated
- proactive
- creative

Job summary

- The research funding manager will report to the Deputy Director of Pasteur MS in charge of innovations and partnerships

- The manager will supervise the initial stage process of applications to grants that aim at funding the research in microbes and health, which includes:
  - identifying relevant calls, especially international ones, with the help of the Scientific Mapping and Communication Service (SCCS/DDGO)
  - annotating calls in order to select the most relevant for the Institut Pasteur
  - diffusing calls to the corresponding scientific panels in the Pasteurian community in Paris and in the Pasteur International Network, with the help of the SCCS
  - largely contributing to the writing of the pre-proposals, being capable to suggest a program from briefs inputs and ideas from researchers
  - being responsible for on-time transfer of the pre-proposals to the Grants Office (GO/DDGO) in charge of the final submission
  - writing scientific synthesis for either partners or general public

- The manager will participate in the search of international partners relevant for applications to collaborative calls, including industrial partners with the help of the Tech Transfer Department.

- The candidate must have excellent skills in written and oral communication, be able to elaborate and perform a cogent presentation to partners and sponsors.
- The candidate must be a 'self-starter', be able to work collaboratively as a major contributor to the development of a project, and have the ability to work to deadlines and deliver high quality results.

Preferred experience

- Writing grants / fellowship applications, science writer …
- Scientific background in Life sciences and capacity to understand the science, and as a consequence the content of the grant applications
- Participation in cross-functional teams

Education requirements

- PhD and/or MD in biological sciences or Physics/Chemistry with biological applications
- Excellent oral, writing and presentation skills in English
